- Data and Reports (Export to CSV or Excel)
- Custom Alerts on Any Monitored Equipment
- SMS Access to Site Details
- Optional 4.3" NEMA 4X Display Unit 480x272 Resolution with Touchscreen
- Up to 4 Analog Inputs (Tank Level, Salinity, Leak Detect, and More)

We Put You In Control of Your Site Anytime, Anywhere!

Our Monitor & Control Solutions provide numerous options including advanced leak detection tailored for real-time remote monitoring of tank systems, including containment and dual-line configurations. Equipped with sophisticated sensors, the system precisely detects leaks using multiple methods, such as fluid detection and salinity measurement enabling differentation between freshwater and saltwater. Instant alerts are sent via SMS, calls, emails or local strobe lights, ensuring rapid response to potential threats. Designed to safeguard both personnel and the environment, this cutting-edge solution offers proactive protection against leaks and spills, providing unmatched reliability and peace of mind.
